Prof. Dhanraj T. Dhangar,
President, International Research Fellows Association
Asst. Prof. Marathi,
M. S. G. College, Malegaon Camp,
Nashik [M.S.] India.

Dear Readers,

Hellow & welcomes on the portal of Research Journey Multidisciplinary International E-Research Journal. Now you are reading '**Research Journey's 3rd Issue**'. This issue is including seven different articles.

First article of Dr. P. M. Bhagde, he has researched on 'The Role of Indian Industrialization in Economics Development'. He feels significance to analyze the role of industrialization in the Indian economy. Actually some questions are raised in his mind such as "*Is it necessary that every country must aim at industrialization? Can we achieve a betterment of living standards of our people without industrialization? Can we think of developing other sectors, by exporting the products of which we would import industrial products?*" It motivated himself to research. So I think research is nothing but a procedure of finding the answers of raised questions in creative mind. 2nd Article of this issue is on 'The growth of Population in Malegaon Tehsil' by Dr. A. D. Pawar. He analysed the period of 60 years (from 1951 to 2011) in this research. At the end he found that is regular increment in population of Malegaon Tehsil, the growth in the population of urban area is more than the rural area. This research paper is the good example for them who want to research on small & local area. Prof. Shailaja Patil focused on the theory of '*Deshiwaad*' (*indigenouism*) which is one of the theories of criticism in new streams of literature. She has stated, this is the perfect theory to understand and to criticize the Marathi literature in present socio-cultural scenario. Mr. Ajij Tadavi has researched on the aborigine Barkari tradition of Bhillia Tadavi Aadivaasi. It is very original and basic research will know for new and interesting information about Tadavi Community. Next one article of myself, entitled '*Dnyaneshwaritil Karyakarya Vivek : Ek Aaklan* (A special Reference of 14, 15, 16 Addhyay of Dnyaneshwari), it is the part and parcel of the series published about the research on Dnyaneshwari in our famous E-journal

'Uniresearch Multidisciplinary E-Research Journal' on our website www.uniresearch.net. In this paper I have mentioned significance of rational thinking before every work. Prof. Sachin Patil has done his research by few references on 'Impact of globalization on Post 1990's Marathi Rural Literature' & Mrs. Asha Kale has written her paper on Struggle for Self Esteem in Kiran Desai's 'The Inheritance of Loss'. This paper is also filling with knowledge & sense.

I tried to introduce articles which are included in this issue. Now the issue is before you. So please you decide the quality and send your valuable comments to us. Our peer referees and hardworking editors have taken great effort and touched the content gently. The pattern and perspective is that of the respective authors alone, and they are responsible for the views and versions in their papers.

We are here, to make the '*Research Journey*' the best among equals. Your academic co-operation and constructive valuable suggestion(s) - solicited.

Happy reading!
